

MBA RESOURCES CORP. (formerly MBA GOLD CORP.)
THREE MONTHS ENDED APRIL 30, 2006
MANAGEMENT DISCUSSION AND ANALYSIS

1. Report Date and Description of Business

The following Management's Discussion and Analysis ("MD&A") is prepared as of June 29, 2006 and should be read in conjunction with the unaudited financial statements for the three months ended April 30, 2006. These documents can be found on the Company's website or at www.sedar.com. All dollar figures stated herein are expressed in Canadian dollars.

MBA Resources Corporation (the "Company" or "MBA") is a Canadian based natural resource company that owns a 50% interest in the Gordon Creek natural gas field in the State of Utah, USA. MBA's other holdings include an oil and gas exploration project adjacent to the Stoney Creek field in New Brunswick, Canada and a gold exploration project adjacent to the Sleeper Mine in Humboldt County, Nevada.

The Company's US operations are carried through Manele Bay Goldfields Inc., a wholly-owned, Nevada based subsidiary. The Company also has a 100% owned Canadian subsidiary MBA Energy Corp.

2. Overall Performance

On March 13, 2006 the Company acquired a 50% working interest, subject to varying royalties, in a producing natural gas field in Carbon County, Utah known as the Gordon Creek Project for U.S. \$1,500,000. The field comprises 5,953 gross acres (4,879 net acres) with four gas wells currently producing and four wells that are shut in. The Project is now jointly operated by the Company and the party that holds the other 50% working interest.

Gas is marketed into a transmission pipeline operated by Questar Gas Resources that crosses the project acreage. The Gordon Creek field also includes an associated gas gathering system consisting of 10 km of pipeline and a scaleable compression facility that services the project as well as adjacent production.

Subsequent to the end of the quarter the Company commenced workover operations on two of the existing wells and intends to review available data from all of the wells, with a view to potentially reworking all eight wells. Later this fiscal year, the Company intends to commence drilling additional wells on the property and has presently identified drilling locations for up to twenty new wells.

During the first quarter of fiscal 2006 the Company drilled and tested an initial well on the Dover – Gautreau oil and gas prospect in New Brunswick, Canada as discussed below, called the Contact-MBA Gautreau F-29-2328 well (the "Gautreau #1"). The well was cased to total depth and tested in 9 intervals totaling over 27 meters of potential pay. Completion operations included perforating the above intervals and running recorders to measure pressure build-ups. Sampling of oil and gas recoveries and flow testing were also carried out. The shallowest zone, located from 356 to 364 meters, encountered light 35 API oil. Results of the completion indicated that both oil and gas are present, but current rates of recovery without further stimulation do not appear to be economic at this time. By completing the Gautreau #1 the Company earned a 50% working interest in the well and a surrounding 3 section parcel of land. The Company also holds certain rights to participate in further exploration within an adjacent area of interest covering approximately 50,000 acres until the end of 2006.

At this time the Company intends to focus its attention on the recently acquired Gordon Creek Utah project while it monitors the exploration activity of other companies in New Brunswick and Nova Scotia. These activities include a drilling program currently being undertaken by Contact Exploration Inc. on the Stoney Creek oil and gas field immediately adjacent to the Dover Gautreau project.

MBA RESOURCES CORP. (formerly MBA GOLD CORP.)
THREE MONTHS ENDED APRIL 30, 2006
MANAGEMENT DISCUSSION AND ANALYSIS

3. Results of Operations

During the quarter the Company completed the acquisition of the Gordon Creek natural gas field in Utah, USA as well as completing a convertible debenture issuance and private placement financing. Accordingly, the Company began to recognize revenues from the project, but also incurred higher costs resulting from the acquisition and financing activities as well as costs associated with the transfer of operations from the previous owner to a new operating Company that is 50% owned by MBA. Revenues were negatively impacted by declining natural gas prices during the quarter.

The Company earned revenues of \$89,005 for the quarter as compared to \$0 during the comparable prior period. The Company incurred a \$75,453 loss in the current quarter as compared to \$46,286 loss in the prior period.

Resource Properties

Gordon Creek Project

On March 13, 2006 the Company acquired a 50% working interest, subject to varying royalties, in a producing natural gas field in Carbon County, Utah known as the Gordon Creek Project for U.S. \$1,500,000. The field comprises 5,953 gross acres (4,879 net acres) with four gas wells currently producing and four wells that are shut in. The Project is now jointly operated by the Company and the party that holds the other 50% working interest.

Gas is marketed into a transmission pipeline operated by Questar Gas Resources that crosses the project acreage. The Gordon Creek field also includes an associated gas gathering system consisting of 10 km of pipeline and a scaleable compression facility that services the project as well as adjacent production.

Dover and Gautreau Oil and Gas Project

On August 18, 2004 the Company entered into an oil and gas farm-in agreement with Contact Exploration Inc. (TSX-V: CEX) of Calgary, Alberta whereby MBA could earn a 50% working interest in the Gautreau and Dover oil and gas prospects in Eastern New Brunswick by incurring 100% of the costs of drilling and completing the well on the prospect. Proceeds from the private placement on December 6, 2004 were used to fund the costs of drilling the Gautreau well.

The Company acquired a 50% working interest in the 2550 acre Dover Prospect by drilling, testing and completing an initial test well during the period January through May 2005. Results of the completion indicated that both oil and gas are present, but initial rates of recovery did not appear to be economic without further stimulation. See Section 2 "Overall Performance".

S310 Gold Property

On September 29, 2004 the Company, through its wholly owned subsidiary Manele Bay Goldfields Inc. ("MBG"), optioned a 100% interest in a group of 11 unpatented lode mining claims (the "S310 Property") adjacent to the Sleeper Gold Mine in Humboldt County, Nevada. To date, the Company has made cash payments of U.S. \$15,000 and issued 125,000 common shares in connection with the acquisition. In order to maintain the option in good standing, MBA must pay a further U.S. \$7,500 and issue an additional 50,000 shares over each of the next 2 years and incur exploration expenditures of an aggregate of U.S. \$400,000 by July 31, 2008. The Company's interest will be subject to a 3% net smelter return royalty, 1.5% of which can be bought out for U.S. \$1.5 million. The Company did not incur any exploration expenditures on this property during the year.

Worldbeater Project

On November 5, 2002 the Company entered into an agreement with Compass Minerals Ltd., ("Compass"), whereby the Company had the option to acquire up to a 60% interest in the Worldbeater Gold Project. During the 2004 fiscal year, the MBA earned its initial 30% interest by carrying out an exploration program exceeding U.S. \$500,000. The Company previously wrote down its investment in the Worldbeater property to \$0, and has now relinquished its interest in the project. As of January 31, 2006, the Company had a net obligation of U.S. \$100,000 relating to the reclamation requirements. This amount was accrued and charged to operations and included in accrued liabilities as at year-end. During the quarter, this amount was paid to the underlying landowner who assumed the reclamation obligations. The U.S. \$90,000 letter of credit (Cdn \$103,329) that the Company had posted as security was cancelled and the short term investment held as collateral for the letter of credit was released to the Company.

MBA RESOURCES CORP. (formerly MBA GOLD CORP.)

MANAGEMENT DISCUSSION AND ANALYSIS

Results of Operations cont.

Market Trend

Oil prices have remained high during the quarter staying in the range of US\$70 per barrel. Natural gas price declined during the first half of calendar 2006 to \$6 per Mcf or lower; however summer heating demands have recently begun to cause some upward pressure in prices. Gold prices have significantly increased over the past year reaching a high of approximately US\$725 per ounce in May 2006. Gold is currently trading in the range of \$580 per ounce.

4. Summary of Quarterly Results

The interim financial statements have been prepared in accordance with generally accepted accounting principles, and are expressed in Canadian dollars.

Amortization increased this quarter due to the purchase and subsequent period amortization of assets related to the Gordon Creek project (see Section 2 "Overall Performance"). *Interest on Convertible Debentures* relates to the issuance of convertible debentures in the amount of \$1,850,000. The debentures bear interest at 10%, which is payable quarterly. The increase in *Office* was due to additional costs related to advertising, promotion and travel related to the Company's listing on the Frankfurt stock exchange. *Production Costs* are costs incurred with the operations of the Gordon Creek project.

MBA RESOURCES CORP. (formerly MBA GOLD CORP.)
THREE MONTHS ENDED APRIL 30, 2006
MANAGEMENT DISCUSSION AND ANALYSIS

Summary of Quarterly Results cont.

General Trends

During the course of the eight prior quarters MBA has seen an increase in its investment in Mineral Properties and Oil and Gas Properties.

In the second quarter of fiscal 2005 the Company acquired an interest in its 2nd mineral exploration property, the S310 Property in Humboldt County Nevada. No exploration expenditures have been incurred on the S310 property to date.

In the third quarter of fiscal 2005, the Company through its wholly-owned subsidiary, MBA Energy Corporation acquired an interest in the Dover and Gautreau oil and gas projects and drilled an initial exploration well.

During the first quarter of fiscal 2007, the Company acquired the Gordon Creek project.

All of the foregoing are described in more detail under the heading "Resource Properties" above. The Company intends to expand its focus on resource exploration and production, with a short to medium term emphasis on expanding cash flow by expanding and developing its Gordon Creek project.

6. Liquidity

Historically the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company has issued common share capital pursuant to private placement financings and exercise of warrants and options. The Company's access to exploration financing when the financing is not transaction specific is always uncertain. There can be no assurance of the continued access to significant equity financing.

During the first quarter of 2007, MBA acquired the Gordon Creek producing gas field which has started to generate positive cash flows for the Company. It is the Company's immediate intention to increase this cash flow by re-working existing wells and drilling additional wells, but the immediate costs of these activities will exceed the available cash flow from the project. Accordingly, additional near term funding will be required. As the Company expands its cash flow from Gordon Creek and other projects, funding requirements for future acquisitions and exploration programs will be mitigated.

At April 30, 2006, the Company had cash of \$165,119 and a working capital deficit of approximately \$45,099.

The Company has no long term debt, capital lease obligations, operating leases or any other long term obligations, other than convertible debentures. The Company has no "Purchase Obligations" defined as any agreement to purchase goods or services that is enforceable and legally binding on the Company that specifies all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the proximate timing of the transaction.

MBA RESOURCES CORP. (formerly MBA GOLD CORP.)
THREE MONTHS ENDED APRIL 30, 2006
MANAGEMENT DISCUSSION AND ANALYSIS

7. Capital Resources and Transactions

The Company had no commitments for capital expenditures as of April 30, 2006. The Company has no lines of credit or other sources of financing which have been arranged at this time.

On March 13, 2006 the Company completed a private placement of two year, 10% convertible debentures in the principal amount of \$1,850,000. The debentures will have a first charge over the assets of the Company. The principal amounts of the debentures are convertible, at the option of the holders, into an aggregate of 10,000,000 common shares of the Company at a rate of one share for each \$0.185 of principal converted. Holders of the debentures will also receive two year warrants to purchase an aggregate of 10,000,000 additional common shares at a purchase price of \$0.185 per share. Proceeds of the placement were used to acquire the Gordon Creek Project described above.

On April 4, 2006 the Company completed a private placement of 4,000,000 units at a price of \$0.10 per unit. Each unit consists of one common share and a one year share purchase warrant. Each warrant entitles the holder to purchase an additional common share at price of \$0.15 per share. Proceeds of the placement are to be used for working capital.

8. Transactions with Related Parties

Koele Capital Corp, of which the President and CEO is a shareholder, was paid or accrued \$15,000 in consulting fees for the quarter. The Company has an ongoing contractual arrangement with Koele Capital Corp to continue monthly consulting fees at \$5,000/month.

Concurrent with the acquisition of the 50% working interest in the Gordon Creek project described above, Fellows Energy, Ltd. ("Fellows") acquired the other 50% interest. Fellows is a US public company that has one member of its board of directors in common with MBA. Fellows received US\$750,000 of its financing for the acquisition from a private British Columbia Company called Black Tusk Entertainment Ltd. ("BTE"). MBA agreed to guarantee the BTE loan to Fellows and share 50% of a 5% over riding royalty payable to BTE on production from the 8 wells currently drilled on the property. BTE also has the option to participate as to a 10% working interest in future drilling on the property. Three directors of MBA provided a portion of the BTE loan.

Certain directors and officers also participated in the convertible debenture financing and in the private placement completed after the year end as described under the heading "Capital Resources and Transactions" above.

- a) In April 2006 the Company completed a private placement of 4,000,000 Units at a price of \$0.10 per Unit, each Unit consisting of one common share and a one year non-transferable warrant to purchase an additional common share at a price of \$0.15 per share. Certain directors and associates thereof purchased 2,780,000 of these Units.
- b) In March of 2006 the Company completed a private placement of \$1,850,000 2 year 10% convertible debentures. The principal value of the debentures are convertible into common shares of the Company at a price of \$0.185 per share and the holders received 2 year warrants to purchase a corresponding number of additional common shares at a price of \$0.185 per share. Certain directors and associates thereof purchased \$760,000 of these debentures.

Thunderbird Films Inc, a company that shares common directors with MBA, was paid or accrued \$11,462 in accounting fees, office reception and rent during the period.
