THUNDERBIRD ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the three months ended April 30, 2007 and 2006
(Unaudited)

1. NATURE OF OPERATIONS AND CONTINUANCE OF BUSINESS

Thunderbird Energy Corp. "the Company" is primarily engaged in the acquisition and development of oil and gas properties and the production of oil and gas through participation agreements.

The Company has interests in oil and gas assets at the production, exploration and development stage, the economic viability of certain of which have not been assessed. The realization of the Company's investment in oil and gas is dependent upon various factors, including the existence of economically recoverable oil and gas reserves and the ability to obtain the necessary financing to complete the exploration and development of the properties.

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles applicable to a going concern which assume that the Company will realize its assets and discharge its liabilities in the normal course of business. The interim consolidated financial statements have been prepared following the same accounting policies and methods of computation as the consolidated financial statements for the year ended January 31, 2007, except as disclosed below. The following disclosure is incremental to the disclosure included with the annual financial statements. These interim consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended January 31, 2007.

Certain amounts in the 2006 unaudited consolidated financial statements have been reclassified to conform to the 2007 unaudited consolidated financial statement presentation; such reclassifications had no effect on the 2006 net loss.

2. OIL AND GAS PROPERTIES

Gordon Creek Natural Gas Project

Cumulative acquisition and exploration costs for Gordon Creek as of April 30, 2007 are as follows:

<u>2008</u>	
Balance, beginning of year	\$ 1,647,704
Deferred during the year	
Geological contractors and consulting	5,100
	1,652,804
Less - Depletion	(9,059)
Balance, April 30, 2007	\$ 1,643,745
<u>2007</u>	
Balance, beginning of year	\$ -
Deferred during the year	
Asset retirement obligation	16,894
Geological contractors and consulting	6,300

Legal	14,661
Production equipment	1,287,351
Travel and accommodation	6,944
	1,787,799
Less - Depletion	(140,095)
Balance, end of year	\$ 1,647,704

THUNDERBIRD ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the three months ended April 30, 2007 and 2006
(Unaudited)

2. OIL AND GAS PROPERTIES (continued)

Rush County, Kansas Oil and Gas Project

On November 7, 2006 the Company entered into a development agreement with an unrelated party to acquire a 50% working interest, subject to royalties and back in interests in six oil and gas wells and associated spacing units in Rush County, Kansas. The Company funded 100% of the cost of three wells in order to earn its 50% working interest in all six wells. The Company will hold the option to earn up to a 100% working interest in subsequent wells to be drilled on the project as well as projects in neighbouring counties.

Cumulative acquisition and exploration costs for the Rush County Project as of April 30, 2007 are as follows:

<hr/>	
2008	
Balance, Beginning of Year	\$ 1,027,707
Deferred during the year	
Drilling	389,469
	<hr/> 1,417,176
Less – Depletion	(7,606)
Balance, April 30, 2007	<hr/> \$ 1,409,570
<hr/>	
2007	
Balance, Beginning of Year	\$ -
Deferred during the year	
Asset retirement obligation	10,812
Drilling	1,099,812
Geological contractors and consulting	2,625
Travel and accommodation	1,827
	<hr/> 1,115,076
Less - Depletion	(87,369)
Balance, End of Year	<hr/> \$ 1,027,707
<hr/>	

Weston County Project

During the period, the Company entered into an agreement, subject to due diligence, to acquire a 50% working interest in oil and gas exploration leases covering approximately 19,000 acres located in Weston County, Wyoming and a further 5000 acres located adjacent to the Company's Gordon Creek property, for a total consideration of US\$ 385,000. A refundable deposit of US\$19,500 (Cdn\$ 22,954) was paid to the vendor. The Company subsequently entered into a farm in agreement whereby the Company's working interest in the Weston County acreage could be increased to 75% by drilling 3 wells on the prospect. This acquisition is subject to due diligence by the Company and was pending finalization as at April 30, 2007.

THUNDERBIRD ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the three months ended April 30, 2007 and 2006
(Unaudited)

3. PROPERTY AND EQUIPMENT

	Cost	Accumulated amortization	April 30, 2007 Net carrying value	January 31, 2007 Net carrying value
Computer equipment	\$ 20,687	\$ 13,286	\$ 7,401	\$ 6,421
Computer software	27,980	2,554	25,426	25,281

Leasehold improvements	2,044	1,532	512	614
	\$ 59,394	\$ 23,542	\$ 35,852	\$ 35,033

4. ASSET RETIREMENT OBLIGATIONS

The Company follows CICA Handbook section 3110 “*Asset Retirement Obligations*”, which requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it was incurred if a reasonable estimate of fair value could be made. The asset retirement obligations have been recorded as liabilities at fair value, using a discount rate of 5% and a 3% inflation rate. The obligations relate to the restoration and closure of the Company’s oil and gas properties, and are capitalized as part of the carrying amount of the long-lived asset. The total undiscounted amounts of the estimated obligations are approximately \$91,000 and are expected to be incurred in fifteen years. The amounts of the liabilities are subject to re-measurement during each reporting period.

The information below reconciles the value of the asset retirement obligation for the periods presented:

	Three months ended April 30, 2007	2006
Balance, beginning of period	\$ 29,114	\$ -
Liabilities incurred	-	-
Revision in estimated cash flows	-	-
Accretion expense	582	-
Balance, end of period	\$ 29,696	\$ -

5. CONVERTIBLE DEBENTURES

In accordance with EIC-158 and CICA 3860, the Company has separately valued the conversion option and the warrants on each issuance from the convertible debentures. The liability component represents the present value of the principal payment of the debentures and the future interest payments and the equity component represents both the fair value of the holder’s conversion feature and the warrants. The convertible debenture discount is accreted to interest expense over the term of the loan. The majority of \$62,000 of issuance costs related to the convertible debentures are included in deferred financing charges and are amortized over the term of the convertible debenture. As of April 30, 2007, a cumulative total of \$15,847 of issue costs had been amortized. The remaining amount of financing charges has been allocated to the equity portion of the convertible debentures.

THUNDERBIRD ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the three months ended April 30, 2007 and 2006
(Unaudited)

5. CONVERTIBLE DEBENTURES (continued)

	April 30, 2007	January 31, 2007
Balance, beginning of year	\$ 3,077,766	\$ -
Face value of convertible debentures issued during the year	-	3,175,000
Equity component	-	(132,536)
Liability portion	3,077,766	3,042,464
Accretion up to face value	12,347	35,302
Liability portion of convertible debentures	3,090,113	3,077,766
Less current portion	(317,137)	(344,000)
Balance, end of period	\$ 2,772,976	\$ 2,733,766

The \$132,536 equity component was recorded as follows:

Allocated to contributed surplus representing fair value of warrants	\$ 32,466
Allocated to equity amount of debentures (gross of issue costs of \$2,837)	100,070
	<u>\$ 132,536</u>

Notes to the Interim Consolidated Financial Statements
For the three months ended April 30, 2007 and 2006
(Unaudited)

6. SHARE CAPITAL (continued)

(b) Issued (continued)

Private Placement

During the period, the Company completed a brokered private placement of 3,499,832 units (“Units”) at a price of \$0.30 per Unit. Each Unit consists of one common share and one-half of one non-transferable share purchase warrant. Each whole warrant is exercisable to purchase one common share of the Company at a price of \$0.50 per share until March 16, 2008. The selling brokers received a cash commission equal to 8% of the gross proceeds from the sale of the Units, and broker’s warrants exercisable to purchase 349,983 additional Units at a price of \$0.30 per until March 16, 2008;

Warrants exercised

During the period, 3,335,000 shares were issued pursuant to warrants exercised at a price of \$0.15 per share for proceeds totalling \$500,250. The warrants were issued as part of the April 4, 2006 private placement. Directors and other related parties exercised 1,975,000 of the warrants for proceeds of \$296,250.

(c) Contributed Surplus

Contributed surplus is comprised of the following:

	April 30, 2007	January 31, 2007
Balance, beginning of year	\$ 625,444	\$ 390,775
Convertible debentures - equity portion (note 5)	-	32,466
Convertible debenture issue costs - equity portion	-	(172)
Stock-based compensation expense [(d) below]	72,109	202,375
	72,109	234,669
Balance, end of period	\$ 697,553	\$ 625,444

(d) Stock-based compensation plans

The Company has established a Share Option Plan (the “option plan”) which provides for options to purchase common shares to be granted by the Company to directors, officers, employees and consultants of the Company. At the date options are granted, the exercise price for an option shall not be less than the fair value of common shares of the Company. Options vest over a period of 18 months. The maximum number of common shares issuable under the plan is 4,500,000.

The following assumptions were used for the Black-Scholes model:

	April 30, 2007	January 31, 2007
Dividend yield	0%	0%
Interest rate	3.93%	4.22% - 4.24%
Expected life (in years)	5 years	5 years
Expected volatility	102.00%	102.00%

THUNDERBIRD ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the three months ended April 30, 2007 and 2006
(Unaudited)

6. SHARE CAPITAL (continued)

(d) Stock-based compensation plans (continued)

The weighted average fair value at the date of grant for stock options is as follows:

	April 30, 2007	January 31, 2007
Weighted average fair value per share	\$ 0.25	\$ 0.19
Total options granted	300,000	2,470,000
Total weighted average fair value of options granted	\$ 76,013	\$ 391,916

For the period ended April 30, 2007, the Company recorded stock-based compensation of \$72,109 (January 31, 2007 - \$202,374).

A summary of the status of the Company's stock option plan as of April 30, 2007 is presented below.

	Number of Options	Weighted Average Exercise Price
Balance, January 31, 2006	2,055,000	\$ 0.38
Issued	1,720,000	0.25
Issued	100,000	0.22
Issued	650,000	0.30
Cancelled	(25,000)	0.55
Cancelled	(250,000)	0.45
Cancelled	(400,000)	0.30
Balance, January 31, 2007	3,850,000	0.31
Issued	300,000	0.30
Balance, April 30, 2007	4,150,000	\$ 0.31

The following table summarizes the stock options outstanding at April 30, 2007:

Options outstanding				Options exercisable

Exercised	\$ 0.150	(3,335,000)	\$ 0.150		
Balance, April 30, 2007		11,254,893	\$ 0.244		

Pursuant to a private placement completed in March 2007 (note 6b), the Company issued warrants to purchase 1,924,910 common shares at a price of \$0.50 per share until March 16, 2008. The selling brokers received broker's warrants exercisable to purchase 349,983 additional Units at a price of \$0.30 per until March 16, 2008. As of April 30, 2007, none of these warrants were exercised.

7. RELATED PARTY TRANSACTIONS

Related party transactions not otherwise disclosed include the following:

	Three months ended April 30,	
	2007	2006
Consulting fees paid or accrued to directors during the period	\$ 22,500	\$ 15,000
Accounting fees, office reception, rent and office supplies paid or accrued to a company with common directors	20,876	11,462
Royalties paid or accrued to a partnership in which certain directors or their associates have an interest	5,207	4,094

8. SUBSEQUENT EVENTS

Subsequent to the period the Company entered into an agreement to acquire the remaining 50% interest in the Gordon Creek project not currently owned by the Company, in consideration of:

- a) cash payments of US\$1.9 million; and
- b) the assumption of debt secured by the project in an amount not exceeding US\$1.1 million.

This acquisition is subject to various conditions precedent, including the consent of creditors of the vendor.

PERIOD ENDED APRIL 30, 2007
MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW AND HIGHLIGHTS

Thunderbird Energy Corp. (the "Company" or "Thunderbird") is a Canadian based natural resource company focused on the exploration, exploitation, acquisition and production of natural gas and crude oil, primarily in the United States. The Company operates a producing natural gas field in Carbon County Utah, known as the Gordon Creek field, and holds a 50% interest in a producing light oil project located in Rush County Kansas. Thunderbird's other holdings include an oil and gas exploration project adjacent to the Stoney Creek field in New Brunswick, Canada.

During fiscal 2007 the Company underwent a significant transition as it moved from an exploration company to a company with two producing assets. The Company had no production revenues during the prior year and had no reserves as of its January 31, 2006 year end.

MHA Petroleum Consultants, Inc. of Denver, Colorado prepared a reserves evaluation report (the "MHA Report" on the Company's oil and gas interests in accordance with NI 51-101 effective January 31, 2007. Specifically, MHA's report covers Thunderbird's 50% interest in the Gordon Creek natural gas project and its 50% working interest in the Rush County, Kansas light oil project. MHA estimated the Company's total proved and probable (2P) reserves at 10,297 MMCF of natural gas and 195,000 barrels of oil (1,170 MCFE) representing a ratio of approximately 10% oil and 90% gas. The MHA Report estimated the Net Present Value of Future Net Revenue discounted at 10% (PV10) of the Company's combined oil and gas interests as of January 31, 2007 at US\$19.3 million, using forecasted prices and costs.

The Company has recently signed two agreements, both of which are pending, which will significantly expand the Company's reserves, production, land position and exploration opportunities. Pursuant to these agreements, the Company has the right to acquire:

1. The remaining 50% interest in the Gordon Creek natural gas project not currently owned by the Company;
2. A 50% interest in approximately 500 net acres adjacent to and immediately North of the Gordon Creek project, effectively doubling the land position; and
3. A 50% interest in 19,000 acres covering multiple potential high impact oil targets, located in Weston County, Wyoming on the Eastern flank of the Powder River basin. The Company has further secured the right to increase its working interest in this project to 75% by drilling three wells.

It is expected that these acquisitions will be completed in the second quarter.

PRODUCTION SUMMARY

	Three months ended April 30,	
	2007	2006
Production:		
Natural gas (mcf)	20,854	23,486
Oil (bbls)	1,290	-

This Management's Discussion and Analysis (MD&A) of the consolidated financial position and results of operations of Thunderbird Energy Corp. ("Thunderbird" or "the Company"), which includes its subsidiaries, was prepared as of June 26, 2007, and is for the three months ended April 30, 2007 and 2006. For a full understanding of the financial position and results of operations of the Company, the MD&A should be read in conjunction with the documents filed on SEDAR, including historical financial statements and press releases. These documents are available at www.sedar.com. The selected financial information contained herein has been prepared in accordance with Canadian Generally Accepted Accounting principles, and are expressed in Canadian dollars, unless otherwise noted.

Thunderbird's Board of Directors and Audit Committee have reviewed and approved the interim financial statements and MD&A.

FORWARD LOOKING STATEMENTS

This discussion includes certain statements that may be deemed "forward-looking statement". All statements in this discussion, other than statements of historical facts, that address future production, reserve potential, exploration drilling, exploitation activities and events or developments that the Company expects are forward-looking statements. Although the company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Factors that could cause actual results to differ materially from those in forward-looking statements include market prices, exploitation and exploration successes, continued availability of capital and financing and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements.

Petroleum and natural gas reserves and volumes are converted to a common unit of measure, referred to as a mcf (thousand cubic feet equivalent), on the basis of 1 bbls of oil being equivalent to 6 thousand cubic feet of natural gas.

RESOURCE PROPERTIES

Gordon Creek, Utah

The Company acquired a 50% working interest, subject to varying royalties, in a producing natural gas field in Carbon County, Utah known as the Gordon Creek Project. The field comprises 5,953 gross acres (4,879 net acres) with four gas wells currently producing and four wells that are shut in. Gas is marketed into a transmission pipeline operated by Questar Gas Resources that crosses the project acreage. The Gordon Creek field also includes an associated gas gathering system consisting of 10 km of pipeline and a scaleable compression facility that services the project as well as adjacent production.

The Company intends to commence the next phase of workover activities on certain of the existing producing wells and shut in wells in the latter part of the second quarter of this fiscal year or early in the third quarter, to be followed by drilling. Permits have been received to drill an initial six wells on the property. Of the six permitted wells, three would be considered development wells and the Company's intention is to drill these three wells first.

The Company has entered into an agreement to purchase the 50% interest in the Gordon Creek project currently held by Fellows Energy, Ltd. and expects the acquisition to close by the end of the second quarter. Thunderbird has also entered into an agreement, subject to due diligence, to expand the Gordon Creek land position by acquiring a 50% working interest in approximately 5,000 acres ("Gordon Creek North") located adjacent to and immediately North of the Gordon Creek prospect, which will roughly double the overall land package.

RESOURCE PROPERTIES (continued)

Rush County, Kansas

During the period, one additional well (0.5 net to the Company) was successfully drilled. At the end of the first quarter, two wells were in production and three were awaiting completion. The Company expects to have all five wells in production by the end of the second quarter. The Company is currently assessing additional drilling opportunities in Rush County and in surrounding counties in Kansas.

Weston County, Wyoming

During the period, the Company entered into an agreement to acquire a 50% interest in approximately 19,000 acres in Weston County, Wyoming, subject to the completion of due diligence. The Company feels that these lands are prospective for large oil pools as well as shallow gas. The purchase price for this acreage and the Gordon Creek North acreage referred to under the heading "Gordon Creek, Utah" above, is an aggregate of US\$385,000. Subject to the satisfactory completion of due diligence, the acquisition is expected to close during the third quarter.

After closing the Company expects to complete an extensive data review, that includes over 400 miles of 2D seismic, in order to develop an exploration plan which will likely include 3D seismic and drilling.

RISKS AND TRENDS

Demand for natural gas has traditionally been highly cyclical and somewhat predictable. Demand for and pricing of natural gas has traditionally been highest during the coldest months of winter and lowest during the warmest months of summer. The primary driver for this cyclicity is the need for residential and commercial heating. As expected, heating requirements are highest during the coldest months and lowest during the warmest months. Because natural gas is increasingly being used to generate electricity increased electrical demand often means increased natural gas demand and pricing. This results in a smaller spike in natural gas demand during the warmest months of the year as electrical demand for space cooling increases. Accordingly, the spring and fall "shoulder seasons" are typically becoming the periods of lowest natural gas prices. The magnitude of this summer spike in natural gas prices is expected to increase in future years as natural gas continues to replace coal as a clean source of electrical power generation.

Oil and natural gas operations involve many risks that even a combination of experience and knowledge and careful evaluation may not be able to overcome. The long-term commercial success of Thunderbird depends on its ability to find, acquire, develop and commercially produce oil and natural gas reserves. Without the continual addition of new reserves, any existing reserves Thunderbird may have at any particular time and the production therefrom will decline over time as such existing reserves are exploited. A future increase in Thunderbird's reserves will depend not only of the Company's ability to explore and develop any properties it may have from time to time, but also on its ability to select and acquire suitable producing properties or prospects. No assurance can be given that further commercial quantities of oil and natural gas will be discovered or acquired by Thunderbird.

Thunderbird's principal risks include finding and developing economic hydrocarbon reserves efficiently and being able to fund the required capital programs. The Company's need for capital is both short-term and long-term in nature. Short-term working capital will be required to finance accounts receivable, drilling deposits and other similar short-term assets, while the acquisition and development of oil and natural gas properties require large amounts of long-term capital. Thunderbird anticipates that future capital requirements will be funded through a combination of internal cash flow, debt and/ or equity financing. There is no assurance that debt and equity financing will be available on terms acceptable to the Company to meet its capital requirements. If any components of the Company's business plan are missing, the Company may not be able to exercise the entire business plan.

RISKS AND TRENDS (continued)

Although Thunderbird has no set policy concerning financial instruments, the management of Thunderbird may use financial instruments to reduce corporate risk in certain situations. Thunderbird currently has no hedging commitments in place and has no present intention to implement any hedging commitments.

These risk factors should not be construed as exhaustive. There are a numerous factors, both know and unknown, that could cause results or events to differ materially from forecast results.

OUTLOOK

During fiscal 2007 Thunderbird established itself as a producer of both oil and natural gas and has assembled a significant land holding in the Rocky Mountain region of the United States. During the first half of fiscal 2008 Thunderbird has entered into agreements to expand its production and land position in Utah (see "Gordon Creek, Utah" above) and has secured the right to acquire a 19,000 acre oil exploration property in Weston County Wyoming.

The Company's objectives for fiscal 2008 are to build production, cash flow and natural gas reserves at the Gordon Creek project through workovers and drilling, following the completion of the pending acquisitions referred to above. The Company also intends to initiate an exploration program in Weston County Wyoming following the completion of that acquisition.

The Company will continue to review further drilling opportunities in Kansas, but will likely not drill any additional wells prior to the fourth quarter for the current year.

North American prices for both oil and natural gas remained relatively strong during the first quarter and into the second quarter. The Company typically realizes a price of \$5 below Cushing spot prices for its Kansas oil sales and a price for \$1 to \$1.50 below NYMEX prices for natural gas. However, in recent weeks the negative gas price differential in the Rocky Mountain region has widened due to short term supply constraints. These supply constraints are expected to continue for the balance of the year, and are expected to negatively impact near term revenues. Additional pipeline capacity for the delivery of gas to Eastern Markets is currently being constructed and will be phased in over the next six to eighteen months. This will provide a longer term delivery solution and contribute to a more favourable pricing regime.

QUARTERLY RESULTS (continued)

Operations

Thunderbird has seen an increase in its investment in Oil and Gas Properties and a decrease in its investment in Mineral Properties over the last eight quarters, reflecting a change in the Company's business focus to energy related assets and operations. The overall increase in expenses during the past eight quarters is representative of the increased activity of the Company, especially during the last four quarters.

During the first quarter of 2008 revenues increased 69% over the first quarter of 2007 due to revenues from the Rush County oil wells being reported for the entire period. There were no revenues from this property in the previous quarters. Revenues from the Rush County project represented 41% of total revenues for the quarter. Revenues from the Gordon Creek project decreased by approximately 14.5% as compared to the first quarter of fiscal 2007, due to decreases in production as a result of mechanical issues. The mechanical issues will be addressed in connection with the workover operations commencing in the second quarter. Operating expenses decreased 23% in the first quarter of 2008 compared to the fourth quarter of 2007 primarily due to the fact that no workover expenditures were incurred during the quarter.

General and administrative

General costs include such items as advertising and promotions, debt issue costs, investor relations, office rent, accounting fees, legal fees, professional and consulting fees, filing fees, transfer agent fees, travel costs and foreign exchange gain or loss, as well as general office expenses. During the first quarter, general costs decreased 23% from the fourth quarter primarily due to the fourth quarter audit and accounting accrual of \$50,000.

Interest charges and Convertible debenture accretion

Interest charges relate to the March 2006 issuance of \$1,850,000 of convertible debentures with an interest rate of 10% paid quarterly, and the November 2006 issuance of \$1,325,000 of convertible debentures with an interest rate of 12%, also paid quarterly. Interest expense increased during the first quarter of the current year as the Company realized interest expenses on both debentures for the full quarter.

Depletion, depreciation and amortization

The Company follows the full-cost method of accounting for oil and gas properties, whereby all capitalized costs relating to the acquisition, exploration and development of oil and gas activities are amortized against future income using the unit-of-production method. This method is based on production volumes before royalties in relation to total estimated proved reserves as determined by independent engineers. MHA Petroleum Consultants ("MHA"), a firm of independent petroleum engineers, estimated Thunderbird's reserves as of January 31, 2007.

Stock-based compensation

During the period, the Company granted 300,000 stock options to an employee, exercisable at a price of \$0.30. In accordance with CICA handbook section 3870, the fair value of the stock options granted are expensed over their vesting period with a corresponding increase to contributed surplus. Using the Black Scholes model for valuing shares, Thunderbird assumed a volatility rate of 102%, an expected life of 5 years, a risk-free rate of 3.93% and a 0% dividend yield.

LIQUIDITY AND CAPITAL RESOURCES

Historically the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company has issued common share capital pursuant to private placement financings and the exercise of warrants and options. The Company's access to exploration financing when the financing is not transaction specific is always uncertain. There can be no assurance of the continued access to significant equity financing.

At April 30, 2007, the Company had cash of \$1,069,928 and working capital of approximately \$605,000, representing an increase of approximately \$650,000 from the first quarter of fiscal 2007. The working capital includes a current liability of \$317,137, representing the current portion of the convertible debenture interest due in 2008. During the period, the Company raised approximately \$1,050,000 (less 8% broker commission and expenses) through a private placement of 3,499,832 units of common stock and \$500,250 through the conversion of \$3,350,000 warrants as detailed below. This cash will be used for working capital purposes.

The Company has no long term debt, capital lease obligations, operating leases or any other long term obligations, other than convertible debentures. The Company has no "Purchase Obligations" defined as any agreement to purchase goods or services that is enforceable and legally binding on the Company that specifies all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the proximate timing of the transaction.

The Company had no commitments for capital expenditures as of April 30, 2007. The Company has no lines of credit or other sources of financing which have been arranged at this time.

Private Placements

During the first quarter of 2008, the Company completed a brokered private placement of 3,499,832 Units of the Company at a price of \$0.30 per Unit; each Unit consists of one common share and one-half of one non-transferable share purchase warrant. Each whole warrant is exercisable to purchase one common share of the Company at a price of \$0.50 per share until March 16, 2008. The selling brokers received a cash commission equal to 8% of the gross proceeds from the sale of the units, and broker's warrants exercisable to purchase 349,983 additional Units at a price of \$0.30 per until March 16, 2008.

TRANSACTIONS WITH RELATED PARTIES

Koele Capital Corp, of which the President and CEO is a shareholder, was paid \$17,500 in consulting fees for the quarter. The Company has an ongoing contractual arrangement with Koele Capital Corp to pay consulting fees of \$7,500 per month.

Concurrent with the acquisition of the 50% working interest in the Gordon Creek project, Fellows Energy, Ltd. ("Fellows") acquired the other 50% interest. Fellows is a U.S. public company that has one member of its board of directors in common with Thunderbird. Fellows received U.S. \$750,000 of its financing for the acquisition from a private British Columbia Company called Black Tusk Entertainment Ltd. ("BTE"). Thunderbird Energy Inc., a wholly-owned subsidiary of Thunderbird, agreed to guarantee the BTE loan to Fellows and share 50% of a 5% over riding royalty payable to BTE on production from the 8 wells currently drilled on the property. BTE also has the option to participate as to a 10% working interest in future drilling on the property. Three directors of Thunderbird or their associates provided a portion of the BTE loan.

Thunderbird Films Inc, a company that shares common directors with Thunderbird, was paid \$20,876 in accounting fees, office reception, rent and supplies during the quarter, pursuant to a cost sharing arrangement between the two companies.

DISCLOSURE OF OUTSTANDING SHARE DATA

Securities issued during the period:

	Shares	Amount
Balance as at January 31, 2006	18,771,498	\$ 11,171,592

Warrants	1,924,910	\$ 0.50	March 2008
Warrants	349,983	\$ 0.30	March 2008

There are no shares held in escrow.

As of June 26, 2007, there were \$1,850,000 of two year convertible debentures outstanding, convertible to common shares at a rate of \$0.185 per share, and \$1,325,000 of two year convertible debentures outstanding, convertible to common shares at a rate of \$0.50 per share for the first year and at a rate of \$0.60 for the second year.

DISCLOSURE CONTROLS AND PROCEDURES

In conformance with the Canadian Securities Administrators Multilateral Instrument 52-109, the Company has filed certificates signed by the Chief Executive Officer and the Chief Financial Officer that, among other things, deal with the matter of disclosure controls and procedures.

Disclosure Control Risks

The Chief Executive Officer and the Chief Financial Officer have evaluated the effectiveness of the disclosure controls and procedures as at April 30, 2007 and, based on that evaluation, believe them to be effective given the size and nature of the Company's operations. All control systems by their nature have inherent limitations and, therefore, Thunderbird's disclosure controls and procedures are believed to provide reasonable, but not absolute, assurance that:

- (a) the communications by the Company with the public are timely, factual and accurate and broadly disseminated in accordance with all applicable legal and regulatory requirements;
- (b) non-publicly disclosed information remains confidential; and
- (c) trading of the Company's securities by directors, officers and employees remains in compliance with applicable securities laws.

DISCLOSURE CONTROLS AND PROCEDURES (continued)

Internal controls over financial reporting

The Chief Executive Officer and the Chief Financial Officer have supervised the design of internal controls over financial reporting and these controls were in place as at April 30, 2007. The Chief Executive Officer and the Chief Financial Officer believe the internal controls, including compensating controls to overcome the lack of certain segregation of duties, and reliance on specialists for complex, non-routine transactions, are designed appropriately given the nature and size of the Company's operations, and that a material deficiency in design does not exist. While management believes the Company's internal controls and procedures provide a reasonable level of assurance that they are reliable, because of their inherent limitations, internal controls over financial reporting may not prevent or detect misstatements, errors or fraud. Control systems, no matter how well conceived or operated, can provide only reasonable, not absolute assurance that the objectives of the control systems are met.
