MANELE BAY VENTURES INC.
Notes to the Interim Financial Statements
April 30, 2003
(Unaudited – Prepared By Management)

1. CONTINUING OPERATIONS

The Company has interests in mining assets at the exploration stage, the economic viability of which has not been assessed. The realization of the Company's investment in mineral properties is dependent upon various factors, including the existence of economically recoverable mineral reserves, the ability to obtain the necessary financing to complete the exploration and development of the properties, future profitable operations, or, alternatively, upon disposal of the investment on an advantageous basis.

These interim financial statements have been prepared on a going concern basis, which contemplates the realization of assets and discharge of liabilities in the normal course of business. Realization values of assets may be substantially different from the carrying values as shown in these financial statements should the Company be unable to continue as a going concern.

2. FINANCIAL STATEMENT PRESENTATION

These financial statements are prepared for interim reporting purposes and do not necessarily contain all the Company's financial information. Readers are advised to refer to the Company's annual audited financial statements for the year ended January 31, 2003 for additional information.

3. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies used in these interim financial statements are as follows:

(a) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and disclosure of contingent assets and liabilities at the date of the financial statements and for the periods presented. Estimates are used for, but not limited to, accounting for doubtful accounts, income taxes, the carrying value of long-lived assets, and contingencies. Actual results may differ from those estimates.

(b) Mining properties and deferred exploration costs

Costs of acquiring mining properties and all exploration costs less related recoveries are capitalized.

The costs of properties, which are abandoned or impaired in value, are written down in the year of abandonment or impairment. Upon commencement of commercial production, all related deferred acquisition, exploration and development expenditures will be amortized and matched with future revenues.

The amounts capitalized represents costs to be charged to operations in the future and do not necessarily reflect the present or future values of the particular properties.

(c) Stock options

As of February 1, 2002, the Company adopted the standard in Section 3870, *Stock-based Compensation and Other Stock-based Payments*, of the Canadian Institute of Chartered Accountants Handbook to be applied prospectively. This section established standards for the recognition, measurement and disclosure of stock-

(c) Stock options (continued)

based compensation and other stock-based payments made in exchange for goods and services. The standard requires that all stock-based awards made to non-employees be measured and recognized using a fair value based method. The standard encourages the use of a fair value based method for direct awards of stock, stock appreciation rights, and awards that call for settlement in cash or other assets. Awards that a company has the ability to settle in cash are recorded as liabilities. For stock options granted to employees, the Company has adopted the disclosure-only provisions of the new standard whereby pro forma net income and pro forma earnings per share are disclosed in notes to the financial statements as if the fair value based method of accounting had been used.

(d) Share issue costs

Direct costs relating to the issuance of shares are charged directly to deficit.

(e) Income (loss) per share

Income (loss) per share is calculated using the weighted-average number of common shares outstanding during the year. The treasury stock method is used in the calculation of diluted earnings per share. Diluted earnings per share is computed using the weighted-average number of common and common equivalent shares outstanding during the year. Common equivalent shares consist of the incremental common shares exercisable upon the exercise of stock options and are excluded from the computation if their effect is anti-dilutive.

(f) Comparative figures

Comparative figures have been reclassified, where applicable, to conform to the current period's presentation.

4. DEFERRED EXPLORATION COSTS

On November 5, 2002, the Company entered into an agreement with Compass Minerals Ltd., a U.S. subsidiary of Compass Minerals NL, NSW, Australia ("Compass"), whereby the Company has the option to acquire up to an 60% interest in the Worldbeater Gold Project. The Worldbeater Gold Project is located in the Panamint Ranges, near Ballarat, Inyo County California. The Company can earn a 30% interest by carrying out an exploration program of at least US\$500,000 over the next 12 months. A further 30% interest can be earned by completing a pre-feasibility study on the property by March 31, 2004. Compass could retain the remaining 40% interest as a joint venture partner if Compass elects to contribute to the cost of a bankable feasibility study, otherwise Compass's interest will be converted to a 20% carried interest and the Company will acquire the remaining 20% interest. Costs incurred to April 30, 2003 totaled \$99,598 and comprise costs relating to consulting, travel, professional fees and property payments.

The Company has agreed to issue 100,000 shares to Compass upon completion of the pre-feasibility study and a further 100,000 shares upon commencement of commercial production. A further 100,000 shares will be issued as a finder's fee.

As a condition to enter into the agreement with Compass, the Company posted a letter of credit in the amount of U.S.\$90,000 (\$141,012) for which a short-term investment in the same amount is held as collateral.

5. INVESTMENT

On April 28, 2000, the Company sold substantially all of the assets of its wholly-owned subsidiary, Theatre.com Inc., to BroadwayOnline.com, Inc. (“BOL”). As part of the total consideration received from the sale, the Company was issued 1,600 Series A convertible preferred shares of BOL. These shares were recorded at a carrying value of \$1 as the Company’s participation in the net equity of BOL is only determinable based on future events, which include future financing entered into by BOL, the financial performance of BOL and ultimately, the sale of the preferred shares.

On January 31, 2001, the Company completed the exchange of its preferred shares in BOL for common shares in Broadway Television Network, Inc. (“BTN”), a Delaware corporation and the corporate parent of BOL. In exchange for the 1,600 Series A convertible preferred shares of BOL, the Company received 469,021 common shares of BTN with a par value of \$0.001 per share.

6. LOANS PAYABLE

The amounts are due on demand, unsecured and do not bear any interest. Included in loans payables is \$35,000 which is due to two directors of the Company.

7. SHARE CAPITAL

(a) Authorized

Unlimited number of common shares with no par value.

During fiscal 2003, the Company received shareholder approval and regulatory approval for a three for one share consolidation. As a result, all references to share and per share amounts in prior periods have been retroactively restated to give effect to the consolidation of share capital.

(b) Issued

	Common shares		Common shares in Treasury	
	Number of shares	Amount	Number of Shares	Amount
